

* Control Statements :

* Control Statements are used to control the flow of execution of the program.

* Control Statements are used to decide which statement will execute, how many times it will execute and when execution should stop (or) skip.

* In Python to achieve control statements we have to follow indentation.

Indentation in Python :

* It refers to the space used at the beginning of the line of code.

* It is used to represent a "block of code belongs to" a particular statement.

* It helps to follow Python Syntax.

if condition :

statements.
